

# Is it an ear infection?

**Just a few chirps and you'll know.**

Ear infections are the #1 reason kids go to the doctor and are prescribed antibiotics. But, they are misdiagnosed nearly 50% of the time.<sup>1</sup>

Now, with EarCheck Middle Ear Monitor you can know anytime. EarCheck uses gentle, "chirping" sound waves to detect the presence of middle ear fluid, the key sign of an ear infection. To learn more, call 888-EAR-CHEK or visit [earcheck.com](http://earcheck.com)
